

Traffic Calming and Streetscape Improvement Solutions

Stamped asphalt provides for a range of Traffic Calming and Streetscape improvement solutions. Ideal for decorative treatments anywhere you want to treat public hardscape surfaces for community beautification and road safety reasons.

Durable attractive treatments for traffic calming devices and other streetscape enhancements balance project beauty with performance and affordability. Fast installations mean substantial reductions in community disruption during construction compared to other decorative hardscape treatment alternatives.

A wide selection of products suitable for all areas of the streetscape.

Public Works and Street Maintenance departments appreciate that these long performing solutions are **applied to asphalt and concrete substrate**. From [stamped asphalt](#) to high performance [preformed thermoplastics](#) and simple, permanent [asphalt and concrete colourization coating systems](#), HUB offers advantages over other decorative paving treatments such as stamped concrete and pavers:

Does not compromised monolithic pavement surface – maintains road surface structural integrity

Durable solutions designed to perform in all applications in all Canadian climates.

Trench cuts quickly and easily repaired

No concrete cracking, pavers heaving and settling – trip hazards eliminated

Unaffected by road salts, chemicals and UV stable colours

Cost effective, customizable designs for all applications

Fast installation – minimal community and traffic disruption

High wear resistant performance solutions for heavy vehicle traffic areas

Excellent skid and slip resistant characteristics

Available in extensive standard and customizable patterns and colours. From simple to creative, they have been used extensively by Municipalities in Canada for over 25 years. Ideal for neighbourhood beautification, crosswalks, traffic calming devices, and streetscape safety. Examples of extensive use of these Traffic Calming Device and Streetscape Improvement Solutions for Canadian roadways and streetscapes include:
