

## Investing in a Decorative Stamped Driveways Ads Value to Your Home

Decorative stamped driveways can be an important improvement to a home's street appeal. Asphalt pavement is the ideal choice for a driveway substrate – Except of course it is not very attractive. The introduction over twenty years ago of StreetPrint – Genuine Stamped Asphalt was a game-changer.

Homeowners have been using traditional materials for their decorative driveway surfaces like paving stones and bricks forever. In more recent times stamped concrete has been used with some frequency. The problem with decorative driveways, aside from exorbitant cost has been the maintenance liability they impose on homeowners. This is particularly true in Canada where the wrath of winter weather imposes itself. Frost heave and settlement, hydraulic issues from constant rain pose driveway maintenance challenges for homeowners. You know the deal, uneven settlement of pavers, cracked and pitted concrete and invasive weed growth make what was once supposed to be attractive driveway both unsightly and potentially unsafe.

Years after the advent of stamped concrete a couple of folks in Kelowna, BC clued into the notion that it might be possible to stamp asphalt also. The result was StreetPrint – Genuine Stamped Asphalt; taking a wire-net template, stamping it into the asphalt and then applying a specialized asphalt coating system to the surface and voila! All the benefits of an asphalt substrate and now attractive too!

StreetPrint– Genuine Stamped Asphalt is the ideal choice for decorative stamped driveways. It produces realistic brick, slate, stone and other design effects on an asphalt base. It combines the flexibility and strength of asphalt with leading-edge coating technologies. This results in a cost-effective, durable driveway surface with low maintenance requirements. From unique heating equipment to specialized coatings that are designed to work together, Stamped Asphalt is the superior surfacing solution. It gives you unlimited creative freedom in your decorative driveway design. You can accomplish more with less. The cost advantages over alternatives like brick or stone can be significant.
